

St. Aloysius Preschool February 2025

Themes:

Post Office & M (2/3-7/2025) –

We will learn how to mail a letter and our home addresses. If you think the address we have on file does not match your actual address, please let Mrs. McNally know.

Valentine's, Feelings + V (2/10-14/2025) – We will talk about God's love and loving one another. We will also have a Valentine's Party on the 13th & 14th. You are welcome to bring in

*Valentine's (please **no food** with the valentines) for all the children (21).*

Winter Break (2/17-21/2025) – School Closed.

Enjoy the time as a family! This break provides you and your child a wonderful time to work on letter and

number recognition. Letters and numbers are everywhere, so point them out. When your child shows competency, have them take a turn at pointing them out. When they seem to have accomplished recognizing letters, move on to letter sounds.

Dental Hygiene & D (2/24-28/2025) – We will learn about ways to take care of our teeth this week. If your child hasn't had their

first dentist visit, this is a good time to start this process.

Other Information:

Child Lures Program- After February vacation we will start our Child Lures program. This program will help the preschoolers to learn about strangers, keeping their bodies safe and healthy, trusting their instincts and respecting others and themselves. An Opt Out form will go home. This form only needs to be filled out if you **do not wish** for your child to participate.

Pick Up Routines:

If there is a change in your child's normal pick up routine, please write a note and place it in their folder. We do not

take the child's word for it, because most preschoolers do not have a good sense of which day it is. If you happened to have forgotten your child's regular pick up routine we can let you know what we have recorded for them.

100th Day of School – Feb.

12th the school will celebrate the 100th day of school (as long as we don't

have more snow days). The Preschool will have a special snack that they need to

St. Aloysius Preschool February 2025

count, think of 100 kind things and make a very long centipede. A day of fun for all!

Home Suggestion:

FINE MOTOR TOOLS

Activity: To improve fine motor & counting skills try counting coins and picking them up with a pincher grasp. Other great fine motor

activities are opening clothespins or tongs, stringing beads, squeezing stress balls and dressing oneself. Strengthening fine motor muscles will help to strengthen writing skills.
